

# Guide d'installation

MySQL pour Windows

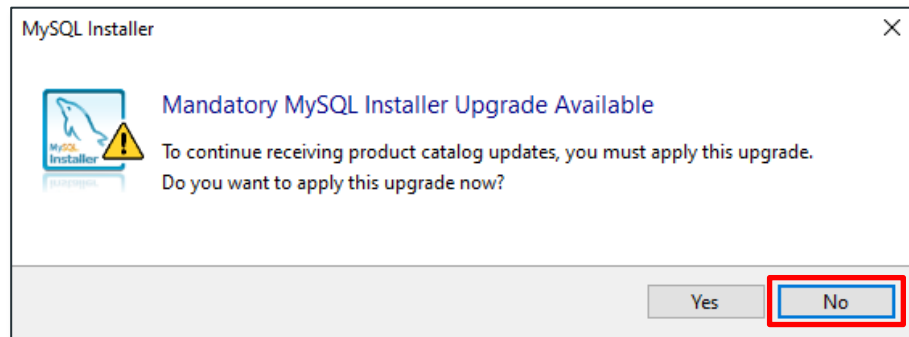

# Installation de MySQL sur la machine

→ Se rendre dans le dossier « fichier d'installation » de la clé USB et lancer (double clique) le fichier :

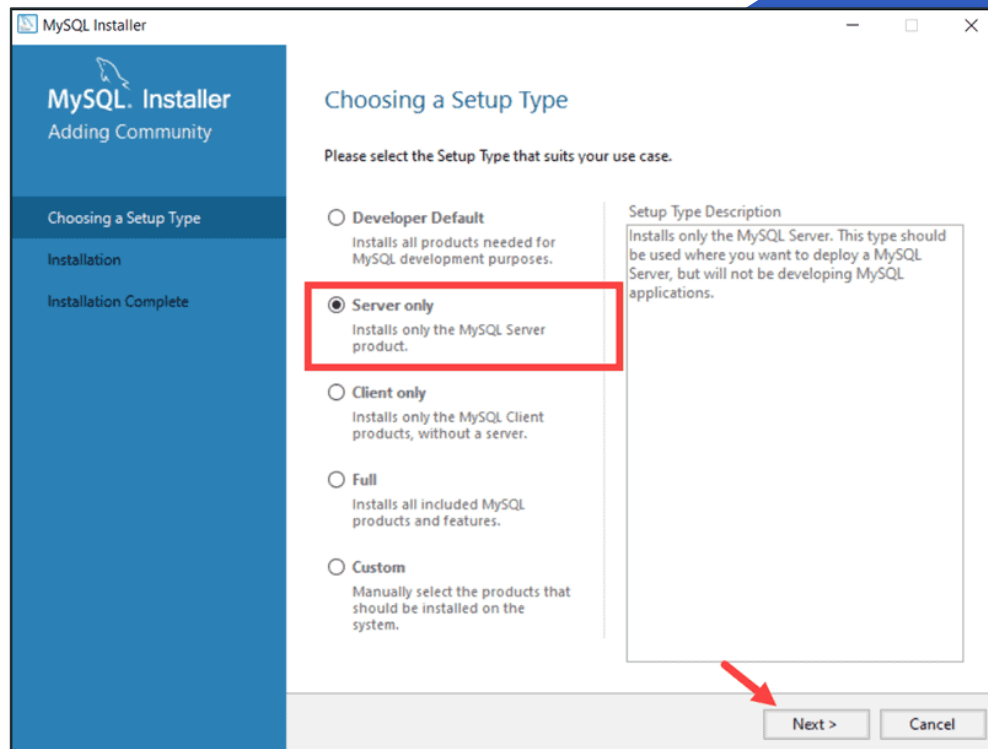

***mysql-installer-community-8.0.31.0.msi***

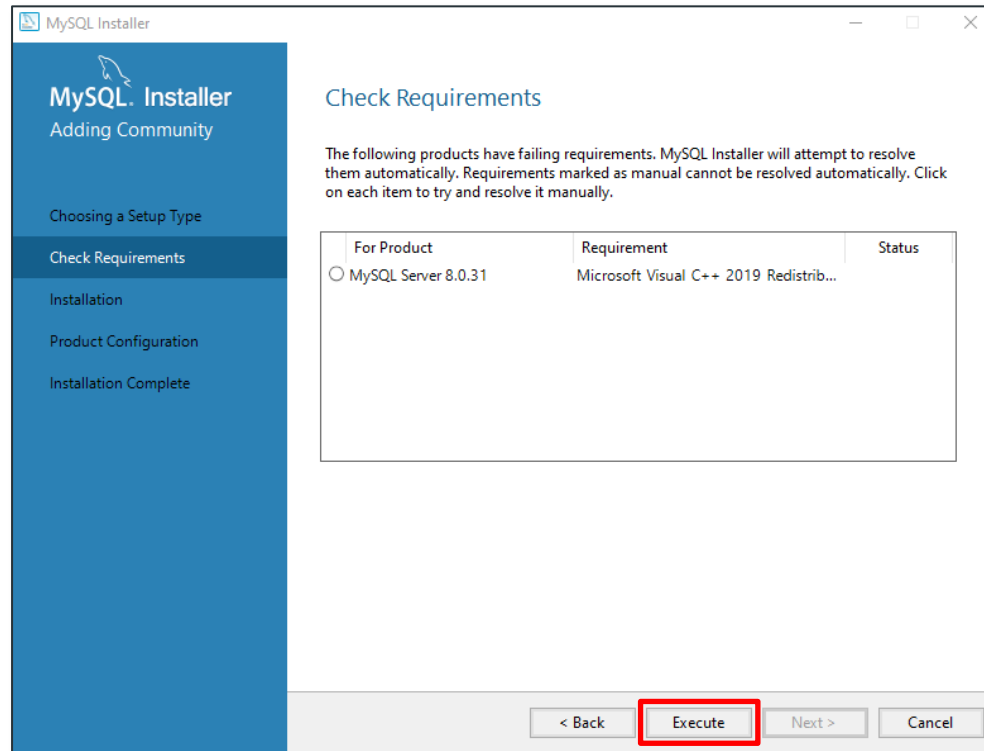

# Configurer le programme d'installation de MySQL pour Windows

Cliquez sur **No**

Sélectionnez l'option « **Server Only** »  
puis cliquez sur **Next >**

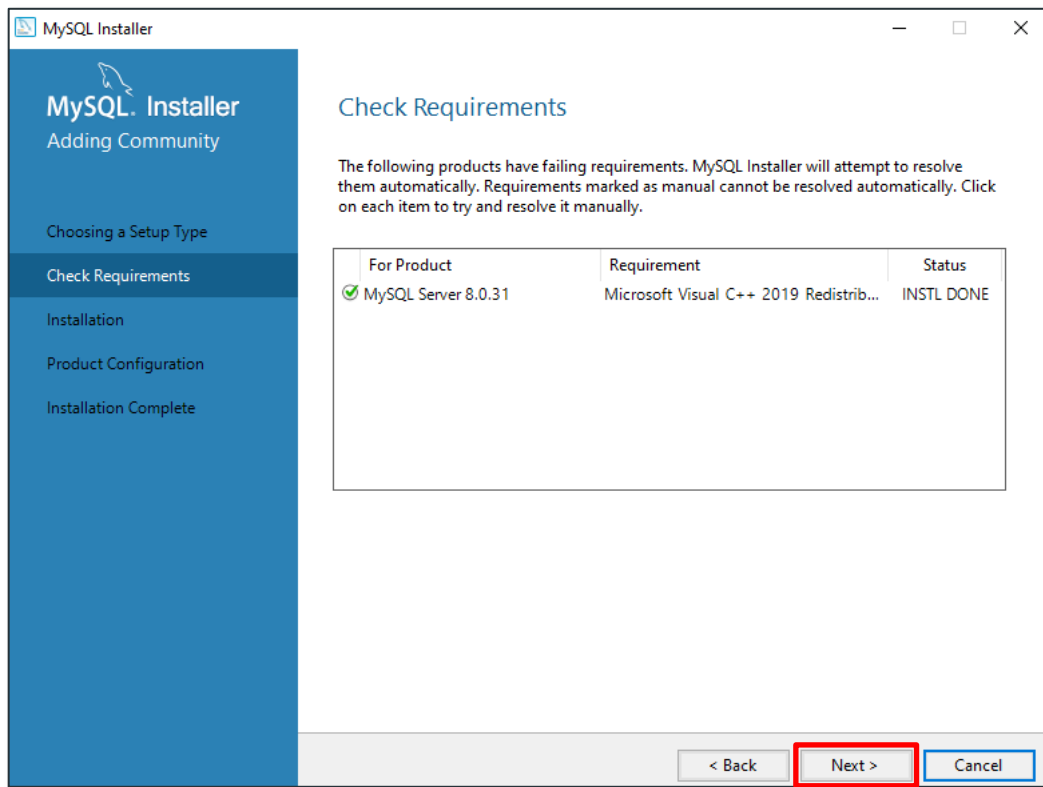

Cliquez sur **Execute**  
(attendre le que le statut soit à 100%)

(Cette étape est facultatif, cela dépend des machines)

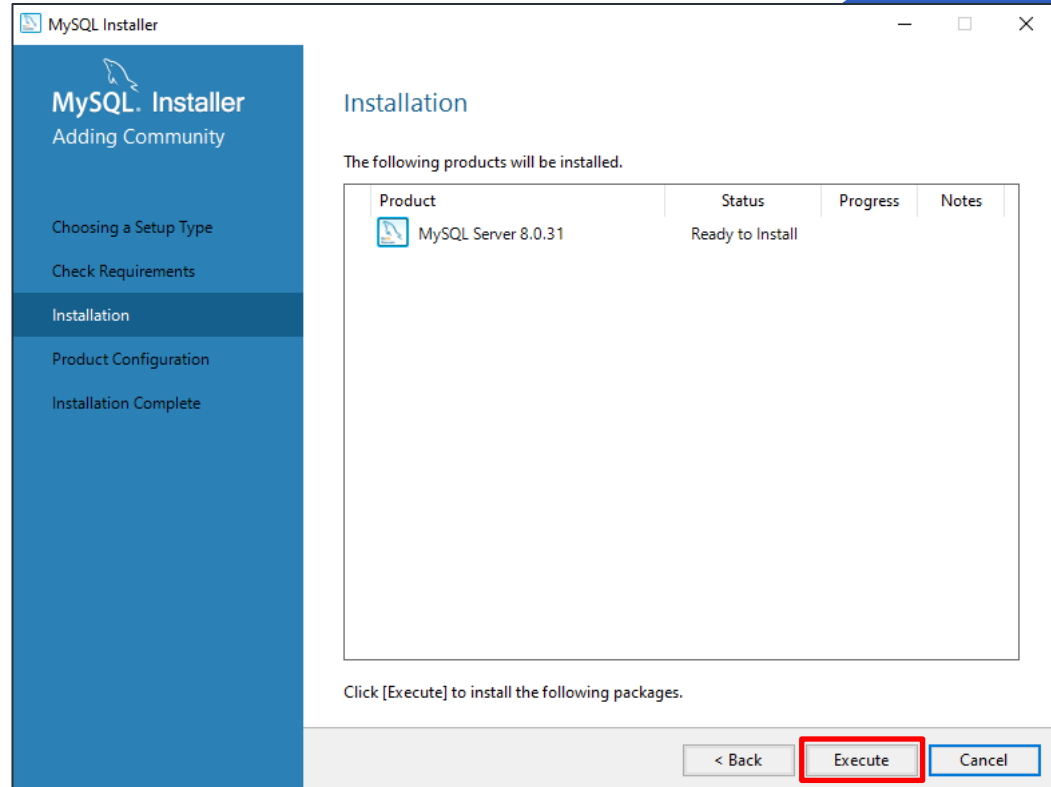

Cochez « J'accepte les conditions... » puis cliquez sur **Installer**

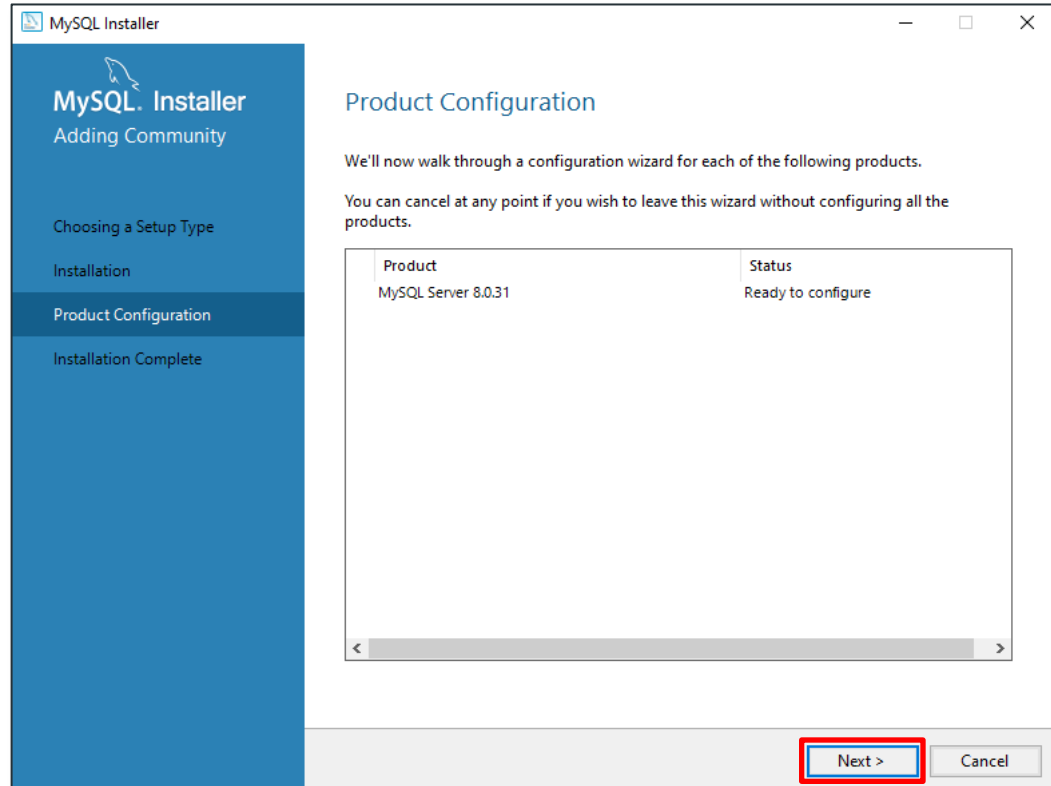

Cliquez sur **Next >**

Cliquez sur **Execute**  
(attendre le que le statut soit à 100%)

Puis cliquez sur **Next >**

Cliquez sur **Next>**

MySQL Installer

MySQL Server 8.0.31

Type and Networking

Authentication Method

Accounts and Roles

Windows Service

Server File Permissions

Apply Configuration

### Type and Networking

**Server Configuration Type**

Choose the correct server configuration type for this MySQL Server installation. This setting will define how much system resources are assigned to the MySQL Server instance.

Config Type: Development Computer

**Connectivity**

Use the following controls to select how you would like to connect to this server.

☒ TCP/IP Port: 3306 X Protocol Port: 33060

☒ Open Windows Firewall ports for network access

☐ Named Pipe Pipe Name: MYSQL

☐ Shared Memory Memory Name: MYSQL

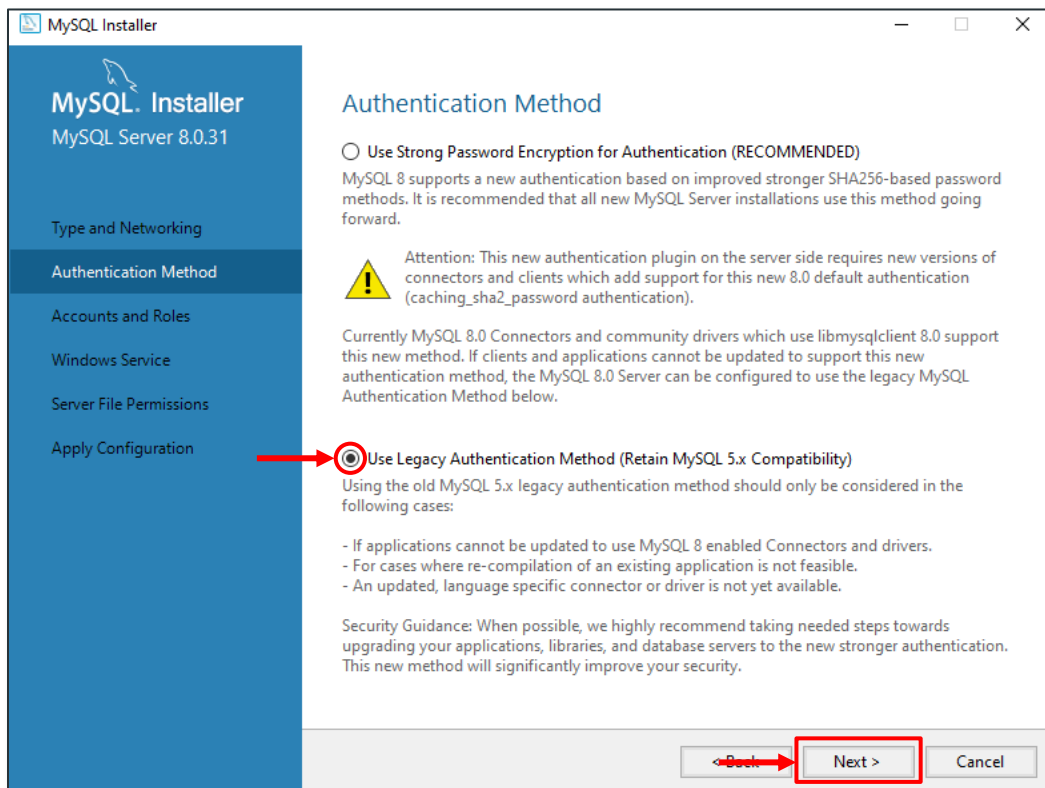

**Advanced Configuration**

Select the check box below to get additional configuration pages where you can set advanced and logging options for this server instance.

☐ Show Advanced and Logging Options

Next > Cancel

Gardez les paramètres par défaut et cliquez sur **Next >**

Sélectionnez « **Use Legacy Authen...** » puis cliquez sur **Next >**

Entrez le mot de passe "**root**" puis confirmez une seconde fois ce dernier dans la case située plus bas.

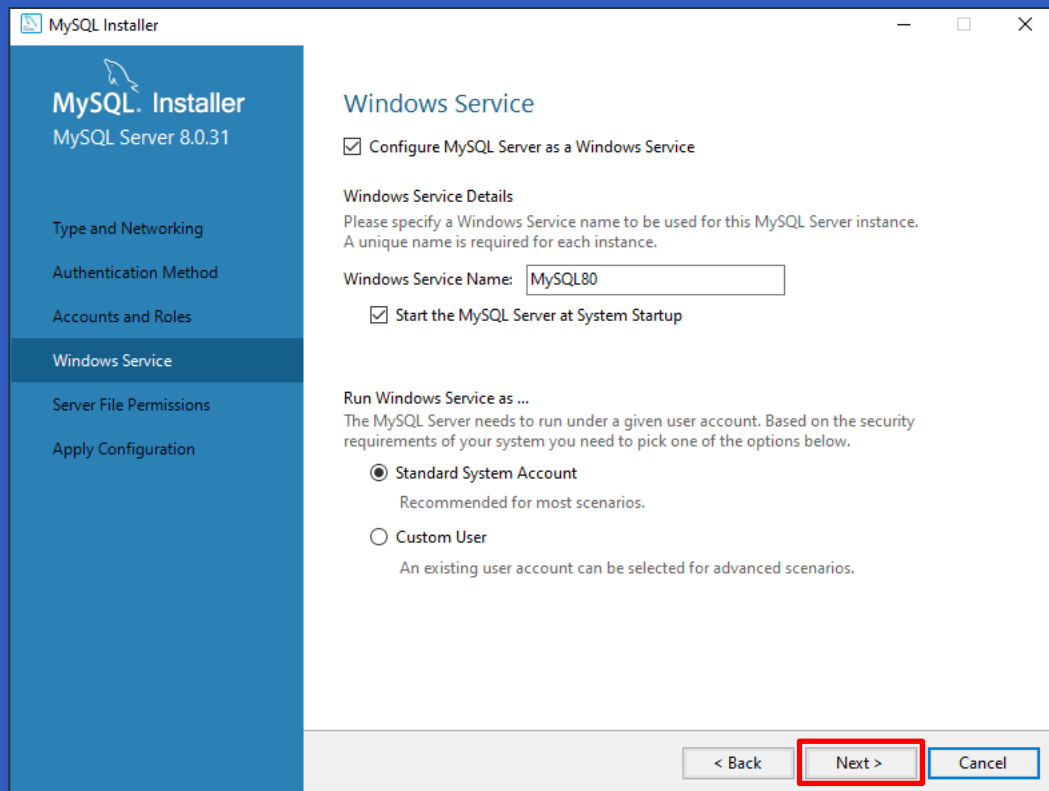

Cliquez ensuite sur **Next >**

*Weak n'est pas un soucis car nous ne sommes pas sur le réseau*

The screenshot shows the MySQL Installer window for MySQL Server 8.0.31. The left sidebar contains the following steps: Type and Networking, Authentication Method, Accounts and Roles (highlighted), Windows Service, Server File Permissions, and Apply Configuration. The main area is titled 'Accounts and Roles' and contains the following sections:

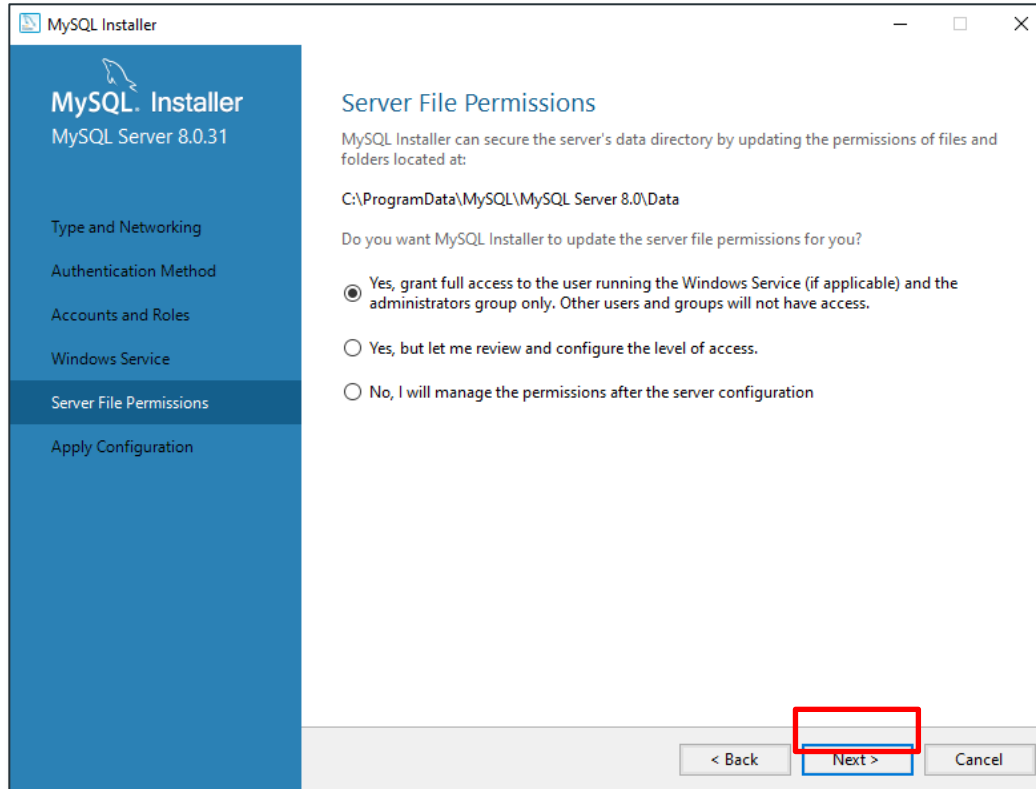

- Root Account Password**: A text box for the root password and a 'Repeat Password' text box. The password strength is indicated as 'Weak' in red text.
- MySQL User Accounts**: A section with the instruction 'Create MySQL user accounts for your users and applications. Assign a role to the user that consists of a set of privileges.' Below this is a table with columns 'MySQL User Name', 'Host', and 'User Role'. To the right of the table are three buttons: 'Add User', 'Edit User', and 'Delete'.

At the bottom of the window, there are three buttons: '< Back', 'Next >' (highlighted with a red rectangle), and 'Cancel'.

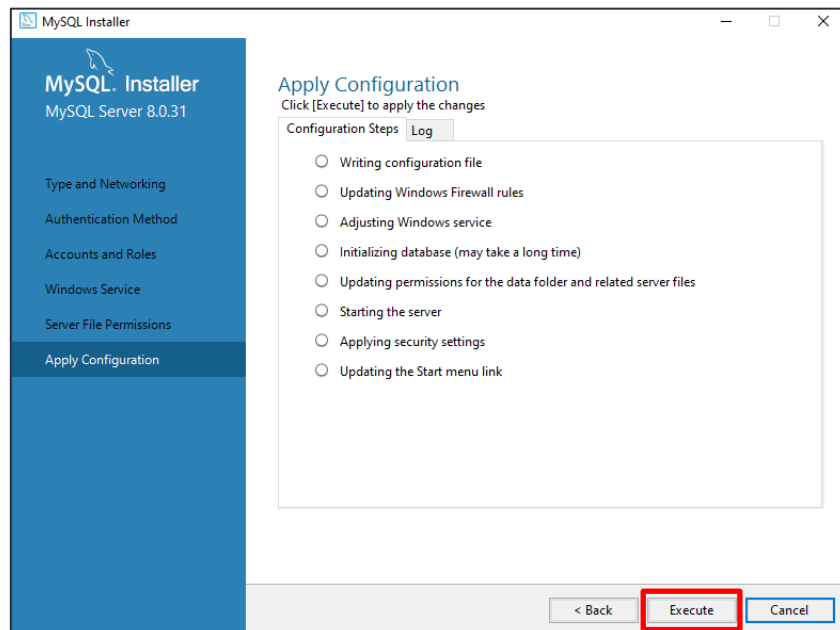

Gardez les paramètres par défaut et cliquez sur **Next>**

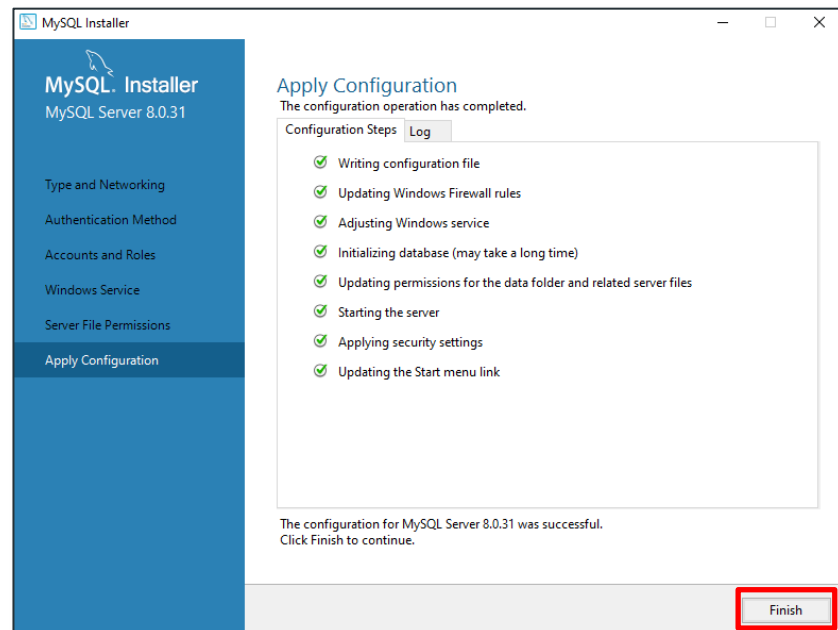

(Cette étape est facultatif, cela dépend des machines)

Cliquez sur **Next >**

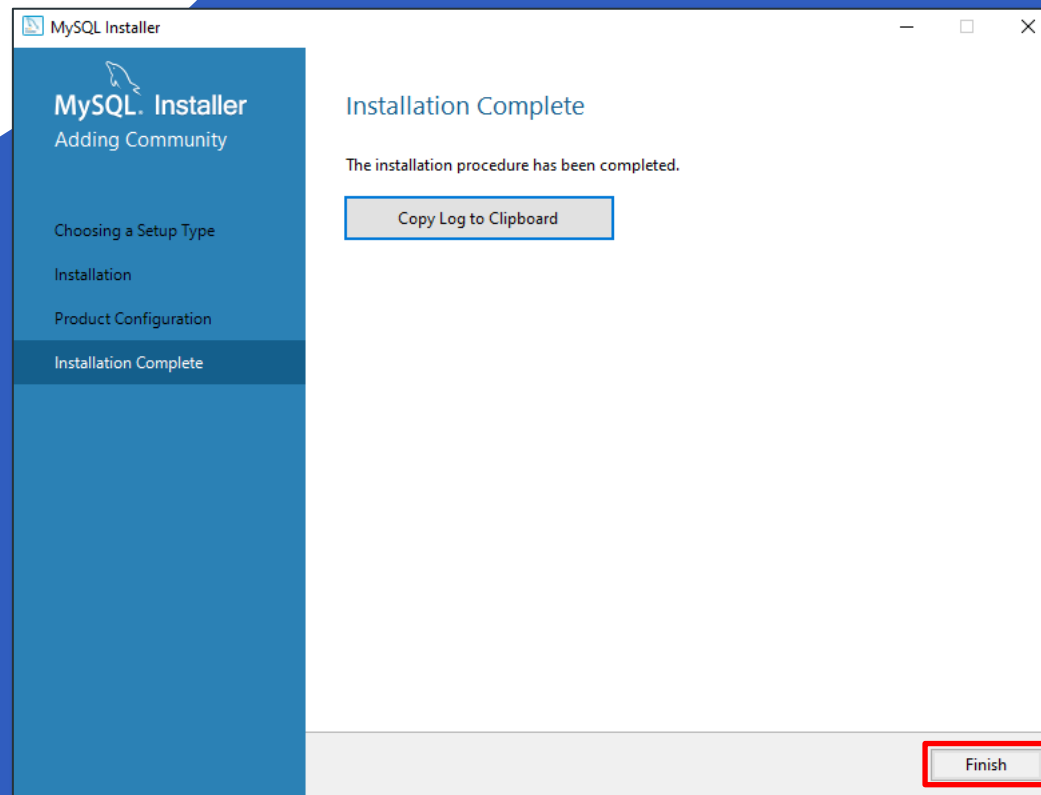

Cliquez sur **Execute**

...Puis cliquez sur **Finish**

# Fin du tutoriel

cliquez sur **Finish**
